\* These rates correspond to the storage for one year of a box with a maximum of 100 tubes. For storage in tubes with 2D coding (only for storage at -80°C), contact the Biobank.

The rates have been determined based on the total cost of obtaining the sample. The final rate includes the proportional costs of obtaining, processing, storage, maintenance and other expenses of a similar nature related to the samples.

The rates of the services must be signed by both the Principal Investigator and the Biobank Manager.

*Rates approved by the Board of Trustees of the Biomedical Research Foundation of the Hospital de La Princesa on December 12, 2019*
